Red Frog Beach

Located on Isla Bastimentos, Red Frog Beach is a wonderfully mellow white-sand beach. Red Frog is backed by portions of thick rainforest which extend in some places all the way to the water, creating secluded alcoves that are perfect for couples or families who would like a bit of privacy.

The sea here tends to be rough, making for less than ideal swimming conditions. However, a far-reaching sandbar ten meters off-shore creates a calmer area with restaurants and bars.

Not surprisingly, Red Frog Beach is one of the best places in Panama to catch site of the amphibian for which the beach is named. These poison-dart frogs are both beautiful and rare, but with the right pair of eyes (or the help of your captain), you may be able to spot one hiding beneath the leaves or sitting on a tree.

You reach the beach by a well-maintained jungle path and on the way you can see a tons of wildlife (sloth, caimans, red frogs, monkeys...).

IMPORTANT : There is a 5\$ fee to pay at the entrance as it's located in the national park

Price: 80\$ boat transportation + \$10 / hour the captain stay + 7% taxes

Polo Beach

Polo Beach on Isla Bastimentos is named after the old man Polo who has lived in a shack on the beach for over 50 years selling fish and lobster plates to the occasional passerby. This area is less popular with tourists as it is farther away and harder to get to, which makes it all the more desirable for a day trip!

Polo Beach is protected from the open ocean by a barrier reef that stretches out over 50 meters from the shore. This makes the water directly in front of the beach perpetually calm and good for snorkeling

Price: 80\$ boat transportation + \$10 / hour the captain stay + 7% taxes

Starfish Beach & Bird Island

A photograph of Starfish Beach, showing a lush green island with palm trees and dense vegetation, surrounded by clear blue water. The island has a rocky shoreline with some small caves or openings.

Starfish Beach, located in Boca del Drago on Isla Colon, is a picturesque tropical beach with distinct Caribbean flavor. The water around Starfish Beach is bath-tub calm and mostly clear due to its location on the bayside of Isla Colon.

Starfish Beach is named after the once abundant starfish population that lived here. However, due to the beach's popularity, now only a few can be found at any given time.

Bird Island off the Northeast corner of Isla Colon is one of the most spectacular sites to see in Bocas and is one of the most popular day tours. Bird Island is famous for its natural beauty and Jurassic Park feel as well as for the rare birds that nest there, including the Red-Billed Tropicbird and Brown Booby.

Bioluminescence

One of the most magical things you can experience in Bocas del Toro is seeing the glow of Bioluminescence. From the swirl of a paddle, to the motion of your body as you swim, every movement in the water produces light!

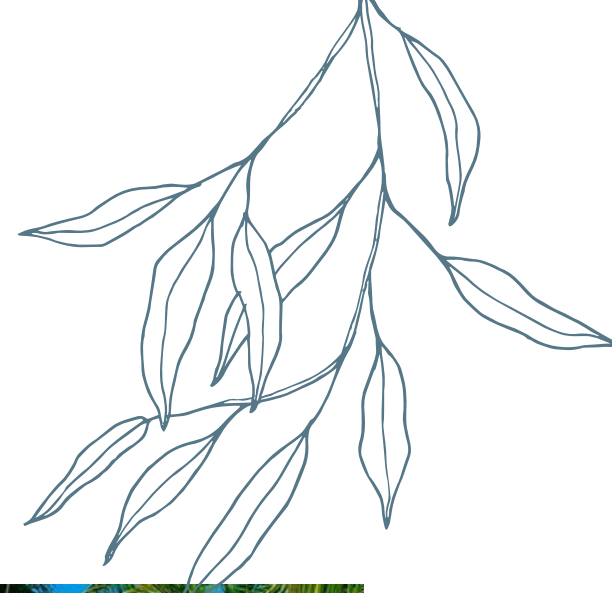

Bioluminescence is the creation of light through a biological process by living organisms. In the Caribbean waters of Bocas del Toro, there are literally thousands of micro-organisms that have the ability to glow in the dark producing a one-of-a-kind visual experience. Renting an ATV from Flying Pirates and taking it out on their trails is one of the most exciting things you can do in Bocas. The trails lead you around the coast to a few of the most beautiful and least visited locations on Isla Colon including La Piscina and the Blue Lagoon where calm, bath-tub like water awaits you. After stopping here to relax and wash off the mud and sand, the trail snakes back into the jungle where howler monkeys, sloths, and more mud happily greet you.
